The Social Side of Hygiene

Society as a rule is generally careful about the state of its health, and it is apt to make good use of remedies known as disease preventives. Germicides and antiseptics are included in this class, but the greatest care should be exercised in using any which contain poisons, unless specified by a physician.

By reason of its absolute safety and its beneficial results, physicians have strongly recommended Tyro's Antiseptic Powder. This preparation appears to occupy a unique position as a toilet and hygienic antiseptic and is better most favorably commended upon by society, both in the States and abroad.
